ReadMe for Replication Files of

"What is Regular Order Worth? Partisan Lawmaking and Congressional Processes"

James M. Curry & Frances E. Lee

December 2018

1. Introduction

This ReadMe file contains information about the data files, variables, and programs used to execute the analyses included in the manuscript and in the supplemental appendix.

All data files were saved as both .dta files for use in STATA and as .csv files for use in other programs. All the analyses were run using STATA. As such, an executable .do file and a STATA log of the analyses are also included.

Further information about how each variable was collected and coded is found in the manuscript.

2. Data file & variable descriptions

<u>Data File</u>: currylee-JOP-data.dta (currylee-JOP-data.csv)

<u>Description</u>: This is a data file of the 621 important laws analyzed in the manuscript. It includes all of the variables used in all of the analyses in the manuscript, as well as those included in the supplemental appendix.

Variables:

variable	description
cong	Congress
billid	Unique bill id
approps	Dichotomous indicator if a bill was an appropriations measure (=1)
hcomm_index	House bill development index
hfloor_index	House bill management index
scomm_index	Senate bill development index
sfloor_index	Senate bill management index
allcomm_index	All bill development index
allfloor_index	All bill management index
chamber	Bill originated in House (=0) or Senate (=1)
major	Policy Agendas Project major policy area indictor
num_committees	Indicator of the number of committees a the bill was referred to
house1_percdem	The percent of voting Democrats supporting initial passage in the House
house1_percgop	The percent of voting Republicans supporting initial passage in the House
senate1_percdem	The percent of voting Democrats supporting initial passage in the Senate
senate1_percgop	The percent of voting Republicans supporting initial passage in the Senate
senatef_percdem	The percent of voting Democrats supporting final passage in the House
senatef_percgop	The percent of voting Republicans supporting final passage in the House
housef_percdem	The percent of voting Democrats supporting final passage in the Senate
housef_percgop	The percent of voting Republicans supporting final passage in the Senate
house1_percmin	The percent of voting minority party members supporting initial passage in the House
housef_percmin	The percent of voting minority party members supporting final passage in the House

senate1_percmin	The percent of voting minority party members supporting initial passage in the Senate
senatef_percmin	The percent of voting minority party members supporting final passage in the Senate
house1_pv50	Dichotomous indicator if the initial passage vote in the House was a 50% party vote (=1)
senate1_pv50	Dichotomous indicator if the initial passage vote in the Senate was a 50% party vote (=1)
housef_pv50	Dichotomous indicator if the final passage vote in the House was a 50% party vote (=1)
senatef_pv50	Dichotomous indicator if the final passage vote in the Senate was a 50% party vote (=1)
bothf_pv50	Dichotomous indicator if the final passage vote in both the Hosue and Senate were 50% party votes (=1)
house1_pv90	Dichotomous indicator if the initial passage vote in the House was a 90% party vote (=1)
senate1_pv90	Dichotomous indicator if the initial passage vote in the Senate was a 90% party vote (=1)
housef_pv90	Dichotomous indicator if the final passage vote in the House was a 90% party vote (=1)
senatef_pv90	Dichotomous indicator if the final passage vote in the Senate was a 90% party vote (=1)
h_nocommhearings	Dichotomous indicator if there were no committee hearings on the law in the House (=1)
h_nocommreport	Dichotomous indicator if there was no committee report on the law in the House (=1)
houseruleclosed	Dichotomous indicator if there the law was considered under a closed rule in the House (=1)
hrule_closeormod	Dichotomous indicator if there the law was considered under a closed or modified closed rule in the House (=1)
h_rule_res	The special rule (or otherwise) that the law was considered under in the House
h_layover72	Dichotomous indicator if the law laid over in the House for less than 72 hours (=1)
h_postcommadj	Dichotomous indicator if there were late stage adjustements made to the law in the House (=1)
s_nocommhearings	Dichotomous indicator if there were no committee hearings on the law in the Senate (=1)
s_nocommreport	Dichotomous indicator if there was no committee report on the law in the Senate (=1)
s_filltree	Dichotomous indicator if the amendment tree was filled on the law in the Senate (=1)
s_clotureinvoked	Dichotomous indicator if cloture was invoked on the law in the Senate (=1)
s_postcommadj	Dichotomous indicator if there were late stage adjustements made to the law in the Senate (=1)
no_conference	Dichotomous indicator if there was no conference report filed on the law (=1)
irt_billdev_1pl	IRT bill development latent indicator
irt_billman_1pl	IRT bill management latent indicator
hfloor_index_2	House bill management index with modified special rules included in the calculations

allfloor_index_2	All bill management index with modified special rules included in the
	calculations
anyhcommunorth	Dichotomous indicator if any unorthodox bill development indicators were =1
	in the House
anyhfloorunorth	Dichotomous indicator if any unorthodox bill management indicators were =1
	in the House
anyscommunorth	Dichotomous indicator if any unorthodox bill development indicators were =1
	in the Senate
anysfloorunorth	Dichotomous indicator if any unorthodox bill management indicators were =1
	in the Senate
anycommunorth	Dichotomous indicator if any unorthodox bill development indicators were =1
	in either chamber
anyfloorunorth	Dichotomous indicator if any unorthodox bill management indicators were =1
	in either chamber
dividedgov	Dichotomous indicator if there was divided government (=1)
dividedchambers	Dichotomous indicator if there was split party control of the House and Senate
	(=1)
house_maj_seat	The number of seats held by the majority party in the House
senate_maj_seat	The number of seats held by the majority party in the Senate
housepolar	First dimension DW-NOMINATE difference between the party medians in the
	House
senatepolar	First dimension DW-NOMINATE difference between the party medians in the
	Senate
